

MoSCoW_Summary

Capacity Math

Assume team velocity = 20 points/sprint × 3 sprints = 60 total points.

Must ≤ 60 % → $0.6 \times 60 = 36$ points available for Must-have items.

From Backlog:

- Must stories total = $5 + 5 + 5 + 4 = 19$ points (< 36)
- Should stories total = $3 + 4 = 7$ points
- Could/Won't stories = 0 points
